FW1 / FW Reveal

FW1 and FW Reveal are Vogler's flat metal soffit panels for commercial soffits, ceilings and walls in the Houston area. FW1 gives a tight hairline joint for a smooth, uninterrupted soffit; FW Reveal adds a recessed joint line for a shadowed, architectural look. Both use concealed fasteners with a rounded interlock leg, and a vented version in .032 aluminum handles attic and soffit airflow. Optional stiffener ribs keep long panels flat, and matching J-channel trim is available. 22 and 24 gauge steel or .032 and .040 aluminum, up to 25' lengths, Kynar PVDF finish. Comparable to PAC-CLAD Flush and Reveal soffit panels; fabricated and installed by Vogler Sheet Metal.

PRODUCT DETAILS

Profile	Flat; hairline joint (FW1) or recessed joint (FW Reveal)
Coverage	12 · 16" (confirm with Vogler)
Depth	⅞" (confirm with Vogler)
Materials	22/24 ga steel · .032/.040 alum
