VSM 3000

VSM 3000 is Vogler's ACM rainscreen wall panel system: metal composite panels with open reveals and a dry, sealant-free joint that drains and ventilates behind the cladding. Perimeter extrusions on each panel nest into extruded track fastened to the substrate, so panels float freely and install over wood or metal framing. 3mm, 4mm or 6mm ACM/MCM or solid plate, rout-and-return fabrication, welded corners available. The clean-reveal rainscreen look architects specify for offices, medical and retail buildings across Houston and Texas, without the maintenance of caulked joints. Comparable to PAC-CLAD PAC-3000 RS, fabricated and installed by Vogler Sheet Metal.

PRODUCT DETAILS

What it is	Rainscreen version of VSM 2000 with open reveals
Panel	3 · 4 · 6 mm ACM; or solid plate .063–.125"
Joint	Dry rainscreen joint, open reveal
Attachment	Free-floating perimeter extrusions nest into track; wood-substrate OK
Finish	Consult Vogler for composite color options

KEY FEATURES & BENEFITS

- Open reveals provide drainage and ventilation behind cladding
- Sealant-free joint
- Floating panel attachment
- 3-, 4- and 6-mm ACM/MCM or solid plate options
- Rout-and-return fabrication; welded corners available
- Can install over wood or metal framing
