WV 16

WV 16 is a wave-profile metal wall panel with a ⅞" depth and 12" or 16" coverage, giving commercial walls a soft, rolling shadow line instead of hard ribs. Concealed fasteners, with a no-clip flange version or a clip-fastened version for thermal expansion, and it interlocks with Vogler's BR Series box rib panels for mixed-profile facades. Specified on schools, hospitals, banks, office and industrial buildings across Houston and Texas. 22 and 24 gauge steel or .032, .040 and .050 aluminum, Kynar PVDF finish in standard, metallic and premium colors. AAMA 502 tested, ICC-ES ESR-5839, Florida approved for siding. Comparable to PAC-CLAD HWP, fabricated and installed by Vogler Sheet Metal.

PRODUCT DETAILS

Profile	Wave
Coverage	12 · 16"
Depth	⅞"
Materials	22/24 ga steel · .032/.040/.050 alum
Uses	Wall (H or V)
Ratings	AAMA 502 · ICC-ES ESR-5839 · Florida siding
Notes	Clip or no-clip versions; interlocks with BR Series

KEY FEATURES & BENEFITS

- Soft wave profile
- Clip option accommodates thermal movement
- Interlocks with BR Series panels
- Available in 12- and 16-inch coverage widths
- Horizontal or vertical installation
- Steel and aluminum with Kynar PVDF finish
