WV 8

WV 8 is the narrow-coverage companion to WV 12: an 8" metal wall panel with a ⅞" rib and 2" reveal, stucco-embossed, that puts reveals closer together for a tighter rhythm on commercial facades, soffits, fascia and screen walls. Same concealed-fastener interlock, same installation over open framing or solid sheathing, horizontal or vertical. 22 and 24 gauge steel or .032 aluminum in 34 colors. Tested to ASTM E1592 and E283, Florida product approved, Texas Department of Insurance listed, ICC-ES ESR-4712. Comparable to Berridge HS-8, fabricated and installed by Vogler Sheet Metal in Houston, Texas.
